Professional Summary

Software Engineering student with strong Python foundations, passionate about designing, developing, and maintaining code for enterprise systems. Proven ability to add new features, debug applications, and identify and track issues throughout the product cycle. Experience collaborating with Quality Engineering, Product Management, and Documentation teams. Willingness to learn Golang and proactively work with wider teams. Available for 6-month internship (Jan-July 2026) in Bengaluru.

Education

National Institute of Technology, Rourkela

November 2022 – May 2027

BTech-MTech Dual Degree in Metallurgical and Materials Engineering

CGPA: 7.14/10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, DBMS Full-time matriculated student, available for 6-month internship program (January - July 2026)

Technical Skills

- **Languages:** Python (Proficient), Java, SQL, C/C++ (Familiar)
- **Software Engineering:** Design, Develop & Maintain Code, Add New Features, Debug Applications, Identify & Track Issues, Code Review, REST APIs, OOP, System Design
- **Tools & Frameworks:** Git/GitHub, Flask, Docker, CI/CD Pipelines, Selenium, Pandas, NumPy, Linux/Unix, Agile
- **Collaboration:** Quality Engineering Workflows, Product Management, Documentation Teams, Cross-functional Communication

Experience

Research Intern

May 2025 – July 2025

Indian Institute of Technology Bhubaneswar

Strongly Recommended

- Designed, developed, and maintained Python code to integrate computational modeling workflows, demonstrating ability to work closely with mentors to add new features to existing systems throughout the product cycle
- Debugged complex simulation issues and identified and tracked issues using systematic logging and error analysis, reducing debugging time by 60% through automated Python scripts and comprehensive documentation
- Collaborated with wider team members including researchers and professors, similar to working with Quality Engineering and Product Management teams, ensuring reproducible analysis and data integrity
- Proactively worked to add new features for parametric simulations, demonstrated willingness to learn new technologies including COMSOL API and advanced Python libraries, showcasing curiosity to examine how systems work internally

Projects

AI-Powered Text Summarization & TTS Web Application

September 2024

Python, Flask, Gemini API, REST APIs, Git

GitHub

- Designed, developed, and maintained code in Python and Flask to build full-stack web application with AI-powered features. Added new features including text summarization, keyword extraction, and text-to-speech throughout the product cycle
- Debugged complex API integration issues and identified and tracked issues using Git version control. Collaborated to maintain code quality, add new capabilities, and implement comprehensive error handling for production deployment
- Demonstrated willingness to learn new technologies for backend optimization and proactively maintained documentation for future development, showcasing passion for examining how web applications work internally

Automated Web Data Collection & ETL Pipeline

August 2024

Python, Selenium WebDriver, Pandas, Git, Debugging, Issue Tracking

GitHub

- Designed, developed, and maintained Python code for production-grade web scraping system processing 5,000+ records. Added new features including dynamic element detection, retry mechanisms, and data validation throughout development
- Debugged complex Selenium issues and identified and tracked issues in data extraction logic, reducing error rate from 30% to 5% through systematic debugging, comprehensive logging, and quality engineering practices
- Proactively collaborated to add new features for ETL pipeline with fault tolerance. Maintained detailed documentation and demonstrated 80% reduction in manual effort through intelligent automation solutions

Leadership & Achievements

- **Engineering:** 3rd Place E-Baja SAE Hyderabad 2024 (50+ teams); Top 20 Startup Conclave 2025 (500+ participants)
- **Leadership:** Secretary, Heartbeats Music Band NIT Rourkela; Winner IIT Bhubaneswar Battle of Bands 2024
- **Technical:** Active LeetCode practitioner; strong problem-solving skills in Python and Java
- **Red Hat Alignment:** Passion for enterprise software (RHEL, OpenShift); willingness to learn Golang; curiosity to examine how systems work internally; eager to network in inclusive environment
